MARKETING STRATEGY

MARKETING RESEARCH

Marketing Objectives

- **Gain recognition and publicity:** To spread awareness of our team efforts and the thrill of the F1 in Schools competition to as many people as possible.
- **Engage with our community:** Foster meaningful interactions and relationships with supporters and local community, cultivating loyalty and a sense of belonging.
- **Gain external exposure:** So we can leverage external media platforms with established user bases (e.g. sponsors) to gain publicity.

All of our marketing strategies were aimed at achieving at least one of the above goals.

Mission & Vision

Team Mission: To spread awareness of our team efforts and the thrill of the F1 in Schools competition to as many people as possible. To provide a platform for the next generation.

Team Vision: Foster meaningful interactions and relationships with supporters and local community, cultivating loyalty and a sense of belonging. Become the 2024 F1 in Schools World Champions.

Target Audience

To our team.

AUDIENCE	AIM	BENEFITS	DEMOGRAPHICS	CHARACTERISTICS
Close supporters	• Positively and regularly engage with them	• Donations • Audience expansion • Media engagement	• **Age:** Any • **Occupation:** Student • International	• Generally other F1 in Schools teams • Family/Teachers • Clear understanding of competition
General public	• Increase all-round team and work awareness	• Donations • Media interactions	• **Age:** Any • **Occupation:** Any • International	• No current understanding of competition
F1 in Schools Community	• Positively and regularly engage with them	• Donations • Audience expansion • Media engagement	• **Age:** Any • **Occupation:** Student • International	• Generally other F1 in Schools teams • Family/Teachers • Clear understanding of competition
Local Community	• Increase all-round team and work awareness	• Donations • Media interactions	• **Age:** Any • **Occupation:** Any • Local	• No current understanding of competition
School community	• Help new teams • Engage with our own audience • Build excitement around our team • Grow inner community	• Media interactions • Continued F1 in Schools program	• **Age:** 12-19 • **Occupation:** Student • Local school area	• Regularly online • Can relate to us as students • Have educational goals • Socially oriented
Motorsport fans	• Showcase the thrill of F1 in Schools in motorsport environment	• Media interactions • Increased interest in project	• **Age:** Any • **Occupation:** Any • International	• Increased interest in our project
Prospective sponsors	• Achieve high tier sponsorship • Promote ROI • Team transparency	• Sponsorship funding • Mentorship • Corporate interest in team • In-kind sponsorship • External media	• **Age:** >30 • **Occupation:** Brand management • International	• Ability to directly support us • Professionally oriented

2.1: Target audience research
Credit: Lunar

Because prospective sponsors have the largest potential benefits, many of our unique selling points were tailored towards them.

These target audiences were also used for our digital media strategy (page 6).

Brand Positioning

SWOT analysis

STRENGTHS:
- Strong educational value
- Enthusiastic & motivated team members
- Support from school & local community

WEAKNESSES:
- Limited financial resources
- Dependence on sponsorships
- Need for broader publicity

OPPORTUNITIES:
- Growing interest in STEM fields
- Potential for media coverage
- Opportunities for local businesses to support education

THREATS:
- Limited awareness about F1 in Schools
- Similar nature to other "school projects"

The SWOT analysis on our team allowed us to further understand how to market ourselves and our brand.

2.2: SWOT analysis of our brand
Credit: Lunar

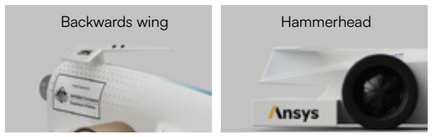

Messaging (how we market ourselves)

- Core team message: Striving for excellence in everything we do (i.e. Showcasing we want to win the World Finals)
- Tone of Voice: Liveliness, fun and balanced professionalism
- Showcasing the thrill of STEM in a positive way

Unique selling points (what we could advertise)

To differentiate ourselves from other teams, we brainstormed various unique selling points (USPs) that we could use in our team's marketing.

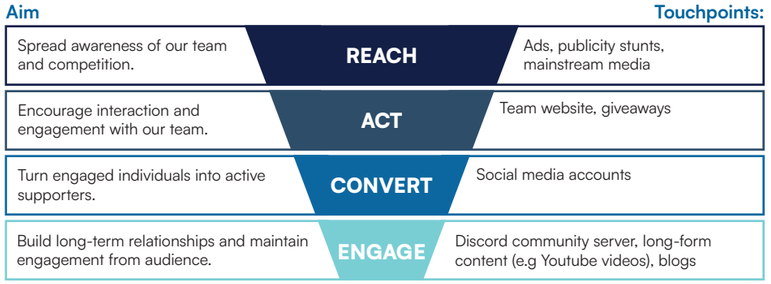

- Australian National Champions.
  Primary audience: Close supporters, Prospective sponsors, School community.
- F1 in Schools association with Formula 1 (world renowned sport).
  Primary audience: Motorsport fans, Prospective sponsors, Wider community, School community.
- STEM education focus.
  Primary audience: Prospective sponsors, School community
- Our new and past innovative car designs.
  Primary audience: Close supporters

2.3. Unique features of our past cars (differentiating us from other teams)
Credit: Lunar

MARKETING STRATEGY

Marketing Framework (RACE Model)

This RACE model was chosen over a traditional marketing funnel, because this framework fosters engaging with our audience rather than selling a product. Because we are not intending to sell products, we used this more active engagement approach.

2.4: Our World Finals RACE model
Credit: Lunar

Content Positioning

To leverage the unique characteristics of our audience groups, we brainstormed possible content ideas that specific audiences would most likely respond to positively, and help us achieve our objectives, categorised below.

CONTENT POSITIONING	OBJECTIVES	TARGET AUDIENCE	CONTENT IDEAS
General marketing	Maximise exposure to as many people as possible.	General public	Billboards, TV advertisements
Mainstream media	Leverage high exposure platforms e.g. news.	General public	News feature, newspaper article
Sustainability marketing	Showcase our positive sustainability initiatives.	Close supporters	Planting trees, cleanup the beach, recycling past assets
Community focused marketing	Give back to our local community.	Local community	Pop-up stalls, giveaways
School marketing	Spread awareness and encourage participation in F1 in Schools.	School community	Assembly presentations, school marketing materials
Sponsor collaboration	Provide ROI opportunities & leverage external media	Prospective sponsors	Sponsor launch night event
Motorsport leverage	Leverage our alignment with motorsport & Formula 1	Motorsport fans	Australian Grand Prix, Australian Supercars

2.5: Content positioning brainstorm
Credit: Lunar

ACTION PLANNING

Marketing Materials Budget

Date of purchase replaced with target audience.

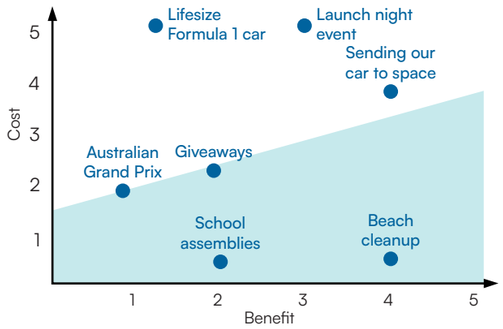

Item	Quantity	Unit Price	Total	Target Audience	Live Status	Primary Supplier
MARKETING						
Sponsorship proposal	10	$0.50	$5	Prospective sponsors	Aquired	Officeworks
Flyers	30	$0.30	$9	STEM oriented organisations	Don't Have	Officeworks
Business cards	50	$0.20	$10	Prospective sponsors	Don't Have	Vista Print
Pitch deck			$0	Prospective sponsors	Aquired	
Website	6	$15.00	$90	General public	Aquired	Squarespace
Team merchandise			$0	Close supporters	Don't Have	Shopify
Social media platforms	5	$0.00	$0	All	Aquired	Meta
Social media ads			$50	Motorsport fans	Don't Have	Meta
Billboard			$200	General public	Don't Have	QMS Media
Newsletters	10	$0.50	$5	Close supporters	Don't Have	Mailchimp
Community pop-up stand			$0	General public	Aquired	In-House
Contingency			$200		N/A	
		Total:	$569			

The totals highlighted in blue, are estimates of total costs, because quantity and/or unit price cannot be identified.

2.6: Marketing extract from our Bill of Quantities (from Project Management portfolio)
Credit: Lunar

Feasibility Study

To maximise the cost-effectiveness of our marketing campaigns, we conducted a feasibility study for potential marketing ideas we had, evaluating their cost (time/resources) vs benefit (impact). This was to ensure we didn't spend unnecessary funds/time on team marketing.

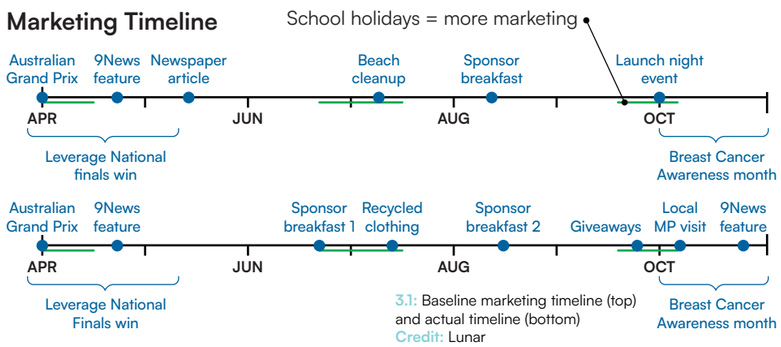

The cost/benefit values were quantified by ranking them from 1-5 as a team.

= Feasible activity

2.7: Feasibility study of marketing ideas

MARKETING MATERIALS

Marketing Timeline

3.1: Baseline marketing timeline (top) and actual timeline (bottom)
Credit: Lunar

MARKETING MATERIALS

Mainstream Media

Nine news feature

Nine news is Australia's largest national news station, broadcasted nationwide to over 1 million people daily. Our team did a 5 minute feature on the TV station where we discussed the details and thrill of the F1 in Schools program and our World Finals competition ahead.

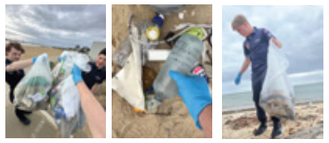

Target audience: General public
RACE touchpoints: Reach & Act
Benefits: Mass viewership, team recognition, STEM exposure
Objective: Gain recognition and publicity
KPIs: >50,000 Views

3.2: Filming of Nine News feature
Credit: Nine News Australia

Sustainability Marketing

Beach cleanup championship

Our team vlogged ourselves multiple times cleaning up the beach, making it a fun competition of who can pick up the most trash off our local beach in 2 hours. This was posted to our team's social media sites, and seen by the general public, where we fostered physical support from people walking past, some even helping us clean up the beach.

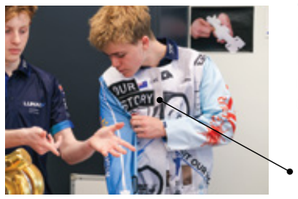

Target audience: Local community
RACE touchpoints: Engage
Benefits: Climate action, positive recognition
Objective: Engage with our community
KPIs: 6,300 organic views

3.3: Videos of our beach cleanup championship
Credit: Lunar

Recycled clothing

Using fabric from our previous pit displays, we sewed together team clothing that we showcased extensively on our digital media sites and will again at the World Finals, as it is a symbol of our team's history and contains historical information from our previous competitions.

Target audience: Close supporters
RACE touchpoint: Engage
Benefits: Waste reduction, unique marketing material
Objective: Engage with our community
KPIs: 990 total impressions

3.4: Recycled fabric race jacket
Credit: Lunar

Community Marketing

Local Member of Parliament (MP) visit

Zoe Daniel, our local Member of Parliament came to our workshop to witness and advertise the work of students of Bayside (our City Council) on their digital media sites. This involved showcasing and discussing the F1 in Schools program and our World Finals journey.

Target audience: Local community
RACE touchpoint: Reach & Act
Benefits: External media leverage, positive depiction of STEM
Objective: Gain recognition and publicity
KPIs: 3000+ impressions (800 organic)

3.5: Zoe Daniel visit
Credit: Bayside City Council

Giveaways

We gave away supporters' team uniforms and branded phone cases in a raffle, by advertising it on our digital media sites, and ensuring people entered the competition by following all of our digital media sites first, to foster further engagement.

Target audience: Close supporters
RACE touchpoint: Engage
Benefits: Social media engagement
Objective: Engage with our community
KPIs: 700 accounts reached

3.6: Giveaway posts
Credit: Lunar

School Marketing

Billboard

In collaboration with our school, we created a billboard outside the Australian Formula 1 circuit during the Grand Prix weekend, celebrating our invitation to the World Finals and the alignment with Formula 1. This also provided extensive exposure to our school from attendees of the Formula 1 race.

Target audience: School community
RACE touchpoint: Reach
Benefits: Enticement to prospective students
Objective: Gain recognition and publicity
KPIs: ≈90,000 impressions (physical)

3.7: Billboard
Credit: Brighton Grammar School

School assemblies

Leading up to the World Finals, we presented to our school, hyping up our competition by labelling it as the largest competition our school has ever participated in, and encouraging other students to participate in the

Target audience: School community
RACE touchpoint: Convert
Benefits: More F1 in Schools participants
Objective: Engage with our community
KPIs: 1,500+ student viewers

BGS+ racing program

Alongside supporting younger students, we marketed ourselves and the F1 in Schools program to primary school students and to parents. This proved to be effective due to the hands-on experience of creating a paper car given to the students.

Target audience: School community
RACE touchpoint: Engage & Convert
Benefits: More F1 in Schools participants
Objective: Engage with our community
KPIs: 50 students participants (+ accompanying parents)

3.8: Students participating in BGS+ racing
Credit: Lunar

Sponsor Collaboration

Breast cancer awareness month

In October, our team turned pink in support of spreading awareness of breast cancer in our school and on digital media platforms. This was especially impactful, since we attend an all-boy school, where knowledge of breast cancer may not be familiar.

see page 9 - Breast Cancer Awareness Month.

Target audience: School community
RACE touchpoint: Reach & Act
Benefits: External media leverage, positive depiction of STEM
Objective: Gain recognition and publicity
KPIs: 1,500+ student views, 2,000 organic impressions

Sponsor breakfast

By presenting in front of our sponsors at Business Breakfasts, we also presented ourselves to other members of the community that attended these events, allowing us to gain professional supporters and possible donations.

see page 5 - Sponsor Breakfasts

Target audience: Prospective sponsors
RACE touchpoint: Reach, Act, Engage
Benefits: Donations & new sponsors
Objective: Gain recognition and publicity
KPIs: 100 attendees

Motorsport Leverage

Australian Grand Prix

At the Australian Grand Prix, we had the opportunity to walk through the paddock and meet various drivers and teams, allowing us to market ourselves to high ranking F1 team members and drivers, even being featured on the official Australian Grand Prix social media platforms.

Target audience: Motorsport fans
RACE touchpoint: Reach & Engage
Benefits: Leverage of Formula 1 thrill
Objective: Gain recognition & publicity
KPIs: 1,100 accounts reached

3.9: The team at the Australian Grand Prix
Credit: Australian Grand Prix

Other Marketing Materials

Big car: With our scaled-up car served as a great way to showcase our work in person, especially to audiences not familiar with F1 in Schools, and interested in related motorsports. We took this car on many of our physical activities.

3.10: Scaled-up car
Credit: Lunar

Flyers: To prospective sponsors and interested supporters of our project, our flyers served as a source of information and insight into our team, and how you can support us (>50 collections).

3.11: Team flyers
Credit: Lunar

EVALUATION

Gain recognition and publicity: Our 9News feature as well as our creative media of our beach cleanup and networking at sponsor breakfasts, we believe we fulfilled this objective.

Total: ≈60,000views, ≈100,000 impressions

Engage with our community: Our beach cleanup helping our local community and BGS+ racing for Year 6 students were our main forms of engagement with our community, seeing very positive interest from the people we met and mentored, thus we believe we fulfilled this objective.

Gain external exposure: Although our 9News feature provided exposure, we would have liked to leverage other highly established sites and platforms more. Thus we believe we could have done this better, and will invest more time when next time we compete.

SPONSORSHIP STRATEGY

SPONSORSHIP ACQUISITON

**All cash figures throughout this page are in AUD.*

Sponsorship Objectives

- **Fundraise $65,000:** To fund our project.
- **Foster long-term partnerships:** We plan to compete in F1 in Schools in the future, and would like to maintain the partnerships we make into following competitions.
- **Find new and bespoke ROI metrics:** In order to produce an enticing proposal unique to our sponsors, and provide something more in return other than logo placement.

Acquisition Process

Personal research → Optimise how we approach prospective sponsors through intuitive research. Done via:
- Interviewing current sponsors
- Public scientific research
- Logical reasoning into behaviours of professionals

Pitch deck → Develop materials to convince sponsorship:
- Team flyers
- Short sponsorship proposal
- Detailed sponsorship prospectus
- Promotional video
- Physical pitch

(For more interested sponsors)

DISCUSS ROI

Approach previous sponsors → Current and previous sponsors with a present idea of our project would have the highest likelihood of continuing sponsoring us. Done via:
- Emails
- Video calls
- Physical discussions
- Attending community events

Open donation page → A donation page through the Australian Sports Foundation (ASF) allows sponsors and supporters to donate in less than 1 minute, with the benefit of tax deductions.

Expand network → Find new sponsors for further funding and/or in-kind sponsorship.

Pitch deck materials

4.4: Short sponsorship proposal (2 page)
Credit: Lunar

4.5: ASF donation page
Credit: Lunar

VALUE PROPOSITION

Inherent Benefits

- **Publicity:** By providing their company logo on our team assets as a marketing tool.
- **Tax benefits:** Donating through our ASF donation page is tax deductible, allowing donors to support us whilst claiming it back on tax.
- **CSR fulfillment:** To appeal to our sponsors' CSR, we ensured to highlight the key initiatives of our project that many companies strive to support (see below).
  - STEM education
  - Community engagement
  - Innovation and sustainability

  Examples of team core values (selling points)

Ensuring Relevant Sponsors

Brand alignment

Before every sponsorship, we discussed all brand alignment opportunities, allowing us to tailor our ROI based on what aligns with our sponsor's company. Connection with Formula 1 and STEM were key alignment factors that we leveraged. Below is our alignment with our two major sponsors.

- Formula 1 sponsor
- Australian based
- Sustainability focus
- STEM initiatives

- Formula 1 sponsor
- Educational operations
- Innovation focus
- Digital focus

Other opportunities

Other proposed brand alignment opportunities for our other sponsors included:

- STEM focus/interest
- Motorsport connections
- Community focus
- Forward thinking
- School connections
- Australia based
- Global ambitions
- Innovative & youthful
- Education minded

SPONSORSHIP HIERARCHY

Originally "Title Sponsor."

	TIER 1	TIER 2	TIER 3	PRINCIPAL PARTNER	TITLE SPONSOR
Cash support:	$500+	$2,000+	$5,000+	$8,000+	$10,000+
Score:	1-2	2-5	5-8	8-10	10+

The cash figure is to provide a baseline for monetary support, as this is the amount that will ensure that tier. Our actual ROI is based on the points below, allowing us to rank our sponsors beyond these 4 tiers.

When we initially had 2 sponsors meet the criteria for the Title Sponsor position, we raised the requirements for this tier and introduced a 4th tier below it. This change allowed us to provide greater value to our long returning partner, Red Energy (who already met the new criteria and ranked higher than Arctic Wolf), while still offering high level value to Arctic Wolf. Both sponsors agreed to these changes.

Determining Hierarchy (Scoring)

We weighted the factors below that we believed were most valuable to us in an equation to determine a sponsorship score. This was to ensure we also recognised in-kind sponsorships.

$$\text{Score} = \frac{C}{950} + \frac{P}{1300} + \frac{S}{3} + \frac{T}{2}$$

4.6: Equation for determining sponsor score
Credit: Lunar

- C = Cash support ($)
- P = Product value ($)
- S = Project support (ranked 0-5 - higher = more support)
- T = Time supporting us (number of competitions)

Project support: e.g. External marketing, sustainability initiatives, mentorship ect...

	A	B	C	D	E	F	G
1	SPONSORSHIP						
2	Sponsor	Score	Tier	Cash support ($)	Product value ($)	Project support (1-5)	Time supporting us (# of past competitons)
3	Red Energy	10.59	Title Sponsor	8000		2	3
4	Arcitc Wolf Networks	9.42	Principal Partner	8000		3	
5	Bendigo Bank Elwood	7.26	3	5000		3	2
6	TLC Healthcare	5.60	3	5000		1	
7	Favrte Racing	5.26	3	5000			
8	Lexus of Brighton	3.66	2	3000			1
9	Ansys	3.33	2			4	4
10	Leap Australia	3.17	2			5	3
11	Objective 3D	2.67	2			2	4
12	Brighton Travelworld	1.50	1			3	1
13	Paper Tiger	1.49	1		200	4	
14	Keyshot	1.42	1		1200		1
15	Asics	1.33	1		1300	1	
16	S-Trend	1.33	1			4	
17	Belle Property Brighton	1.05	1	1000			

4.7: Scoring and tiering of all sponsors
Credit: Lunar

Hierarchical Logo Placement

To ensure the appropriate brand exposure is given to our partners based on their sponsorship tier, we developed the following tier chart.

	TITLE SPONSOR	Principal Partner	Tier 3	Tier 2	Tier 1
Most prominent recognition among other sponsors	✓				
Primary logo position on all team assets	✓	✓			
Prominent logo position on team uniform	✓	✓			
Logo on team car	✓	✓	✓		
Prominent logo position on exhibition display	✓	✓	✓		
Logo on back of team uniform	✓	✓	✓	✓	
Logo featured on exhibition display	✓	✓	✓	✓	
Team social media recognition	✓	✓	✓	✓	✓

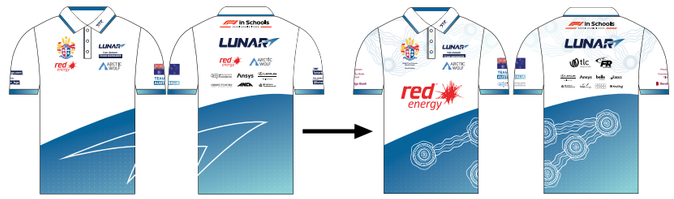

Added after we created the "Principal Partner" tier.

4.8: Sponsor logo placement sponsorship hierarchy
Credit: Lunar

Showcasing (adaptive logo placement)

Below are some logo placement positions we showcased to our sponsors prior to a sponsorship agreement, allowing them to see the physical placement of their logo on our team assets for them to receive their inherent brand exposure.

These positions however were not fixed, so we weren't limited in sponsors. Throughout the project, some team assets were adjusted to fit more higher tier sponsors as we received more of them, ensuring we didn't have to turn down anyone if there was an imbalance in tiers.

4.9: Uniform logo placement changes (most valuable asset for sponsor recognition)
Credit: Lunar

Our sponsors were always promptly made aware of changes that impacted their logo placement, allowing them to provide feedback if they weren't happy with their location, and making them more closely connected to our project.

CREATIVE ROI ACTIVITIES

	TIER 1	TIER 2	TIER 3	PRINCIPAL PARTNER	TITLE SPONSOR
Projected:	5	5	3	0	1
Actual:	6	5	3	1	1

5.1: Number of sponsors in each tier
Credit: Lunar

Crowdfunding ROI

Our fundraising page also opened up the opportunity for close supporters and peers to support us through crowdfunding. In order to express our appreciation to these donors, we:

- Invite them to see our project firsthand
- Provide team merchandise/custom cars
- Send regular updates of our progress
- Give them a special role in our discord server

CREATIVE ROI ACTIVITIES

Red Energy

Industry: Electricity retailer (Australian-based).
Benefit to us: $8,000 sponsorship, Pit display batteries, BCNA connection.

Electricity alignment (pit display)

Partnering with an energy company, we ensured to incorporate their operations in electricity to our team as they supplied us with rechargeable batteries to power our pit display electronics. This was highlighted prominently on our display with “This display is powered by Red Energy.”

5.3: Our Pit Display powered by Red Energy
Credit: Lunar

Australian Grand Prix popup

We visited the Red Energy's popup stand at the Australian Grand Prix, welcoming fans to the "recharge zone" during the event, and showcasing our miniature Formula 1 cars alongside the Formula 1 race, aligning our shared passion for motorsport.

5.4: Australian Grand Prix popup
Credit: Red Energy

Breast cancer support

Because Red Energy are major supporters of Breast Cancer Network Australia (BCNA), during October (Breast Cancer Awareness Month) we helped spread awareness of breast cancer by inviting a member of BCNA to speak to our school about Breast Cancer. This was especially impactful as attending an all-boy school, knowledge of breast cancer was not familiar. This opportunity helped Red Energy provide further support to this charity.

5.5: Breast cancer presentation
Credit: BCNA & Red Energy

Arctic Wolf Networks

Industry: Cybersecurity (Worldwide security operations).
Benefit to us: $8,000 sponsorship.

Cyber security awareness

Arctic Wolf's mission involves protecting people from cyber-attacks and data breaches. Using our team assets, we helped showcase their slogan "End Cyber Risk," which they leveraged in their own marketing and promotion, alongside advertising their social responsibility in supporting us.

5.10: "End Cyber Risk" slogan on team assets
Credit: Lunar & Arctic Wolf

School awareness

Our school uses Arctic Wolf's cyber security on student devices, and making our school aware of the importance of this software helped positively showcase Arctic Wolf's support to us and our school. This was done in a school assembly presentation by our team and school media screens during cyber security awareness month (October).

5.12: Arctic Wolf advertising on school TV screens
Credit: Arctic Wolf

Bendigo Bank Elwood

Industry: Banking (Local community bank)
Benefit to us: $5,000 sponsorship.

Broadcast media

During participating in a local news feature, we placed Bendigo Bank banners in the background of the video helping promote the local branch to viewers of 9News Australia. This was especially effective as being only a small business branch, they gained exposure on one of Australians largest broadcast networks alongside us.

Tailored media

Using these banners and logos on our team assets, we provided them with specific media to help advertise their initiative of supporting the local community, a major aspect of the Bendigo Bank company.

Leap Australia

Industry: Engineering software (Australian-based).
Benefit to us: Ansys simulation and Keyshot rendering software.

Because we use multiple software provided by Leap Australia, we collaborated with them to write a blog post about how we use Ansys simulation and Keyshot rendering to enhance our work and STEM learning - education being a major initiative of theirs, which is why this blog was received well.

Guest Blog: Team Lunar Rockets to F1 in Schools World Finals with Simulation and 3D Rendering

This guest blog from Team Lunar, a Melbourne-based team made up of 6 Brighton Grammar School students participating the F1 in Schools competition explains how their usage of Ansys simulation and Keyshot 3D rendering has helped them get ahead of the pack.

5.15: Cover of blog
Credit: Leap Australia

MAINTAINING ENGAGEMENT

Digital Platforms

- **Emails:** Concise updates of our team and general messaging for relevant information.
- **Microsoft teams:** We regularly met up with our sponsors virtually to discuss team progress and ROI tailoring efficiently.
- **LinkedIn:** A public business profile for sharing updates of our team to a professionally oriented audience, and other employees of our sponsors’ companies.

Sponsor Breakfasts

On two occasions, we invited our sponsors to Business Breakfasts where we are able to chat with them about our progress, and invite them into our workshop at our school to showcase our work afterward. This served as a way for us to maintain engagement with the likes of Arctic Wolf and enabled us to acquire new sponsors like TLC Healthcare.

5.16: Us at the BGS business breakfast
Credit: Brighton Yacht Club

Physical Meetings

By inviting sponsors into our workshop, they witnessed the tangible impact of their support, and allowed us to showcase our work to some of our valuable stakeholders.

5.17: Visits from our sponsors
Credit: Lunar, Red Energy & Arctic Wolf

Graphic Documents

When discussing logo placement and other related ROI activities, we regularly made concise graphic documents for our sponsors when discussions are not always easy to tell with words in an email. Whilst simple, these documents were very helpful at depicting our ideas for our sponsors to concisely see/read about our work, without the need for a meeting, which is not always

5.18: Extract from a document to Arctic Wolf about logo placement on our car
Credit: Lunar

EVALUATION

- **Fundraise $65,000:** We only raised $62,820.
- **Foster long-term partnerships:** Many of our sponsors delivered messages about supporting us for our next competitions.

"We are very proud to partner with Lunar, and look forward to welcoming you into our office to show your talent to our people, and for supporting the team in your future endeavours too! Good luck - we are cheering loudly for you!"

- Nadia Olliver, Red Energy

- **Find new and bespoke ROI metrics:** Yes we did for our main sponsors, however we weren't able to deliver for all sponsors, due to some preferring to not participate in proposed ROI activities.

DIGITAL MEDIA STRATEGY

DIGITAL MEDIA SITES

Digital Platforms

Age = average from our reached accounts.

6.1: Analysis of our digital media platforms
Credit: Lunar

Platform overlaps & purpose

The largest circles of the below diagram allowed us to see which platforms of ours are reaching the largest audiences, which is more effective to expand rather than newly establishing other accounts. They also depict which of the same content can be shared across multiple platforms.

Circle size = Audience size (followers, subscribers etc...).

Larger circle = Larger audience.

6.2: Our spread of digital media platforms (National Finals)
Credit: Lunar

Reach Potential

From our defined platforms, we ranked the potential that each have to reach a large amount of people (which platforms have an algorithm that best promotes content of micro-users like us).

1. TikTok
2. Instagram
3. X/Twitter

High reach potential

4. Youtube
5. Facebook
6. LinkedIn
7. Discord

Low reach potential

High reach potential

Because these 3 platform have the potential to spread to the largest amount of people despite our small current audience due to their unique algorithm for promoting content, our focus was simply rapidly developing engaging content to maximise our audience reach.

Low reach potential

Due to the limited reach potential of these platforms, we focussed more on developing a cohesive space for information and insights into our team rather than being driven by results, as these platforms are most likely only accessed by close supporters of our team.

Objectives

PLATFORM	EXISTING POSTS	POST GOALS	EXISTING FOLLOWERS	FOLLOWER GOALS
Instagram	45	130+	410	1000+
TikTok	2	20+	23	300+
X/Twitter	5	100+	25	100+
Youtube	2	6+	16 subscribers	100+ subscribers
Facebook	0	30+	0	50+
LinkedIn	11	25+	13	100+
Discord server			22 members	50+ members
Website			630 site visits	3000+ site visits

Engagement rate goal: >27%

>27% = Highly engaging content.

<27% = not highly engaging.

Existing metrics = National Finals metrics

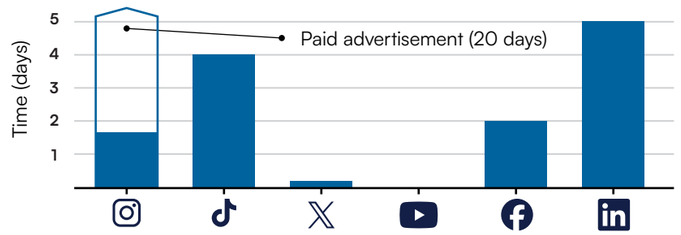

6.3: Objectives for each platform
Credit: Lunar

Our best posts from our National Finals were seen to have an engagement rate of 20-30%, thus we aimed all posts to be at the high end of this range (National Finals average: ≈19%).

OPTIMISATION RESEARCH

Post Frequency

Rather than conducting research on each platform over a long period of time to determine the optimal post frequency, we investigated the time it takes for our posts to stop being recommended to followers. After investigating 5 different posts on different accounts across each platform, we concluded the following.

6.4: Average recommended time of social media posts
Credit: Lunar

Factoring in the time it takes to create content, we developed the following frequency schedule to ensure we maximise the recommendation time of posts (see next column).

PLATFORM	Instagram	TikTok	X/Twitter	Facebook	LinkedIn
POST FREQUENCY	3 posts per week	1 post per week	5 posts per week	2 posts per week	1 post per week

Low reach potential: intentionally lower post frequency (quality over quantity).

6.5: Post frequency schedule
Credit: Lunar

Content

Content format

FORMAT	VIEWS	ACCOUNTS REACHED	TIME TO CREATE	REACH POTENTIAL
Text	20	5	≈1 minute	Very low
Photos	800	630	≈1 hour	Low
Short videos	1500	1000	≈2 days	High
Long videos	120	33	≈1 week	Medium

Primarily focussed content

6.7: Content format analysis
Credit: Lunar

This research was conducted using average statistics from posts from each of our own and similar social media accounts to determine which format to post content in order to reach the most amount of people.

Physical content

CONTENT	AVERAGE ENGAGEMENT RATE (%)		
	INSTAGRAM	TIKTOK	X/TWITTER
Competition event	29	33	5
Team car	25	33	5
Team members	20	25	4
Celebrations	11		4
Sponsor announcements	8		0
Other	27	31	10

6.8: Average engagement rate on our primary social media accounts (National Finals results)
Credit: Lunar

We cannot post about our competition before it occurs, so we focused on the next best content.

This research allowed us to determine what type of content to post that the most people will enjoy (high engagement rate).

Conclusion: Short videos containing our car and/or team members will usually have the highest engagement rate - we also intended to trial unique trending content ("Other" row), as these proved to yield high engagements.

Search Engine Optimisation (SEO)

On page

We updated our website to feature more detailed information about us and our achievements following our National Finals win and leading up to our World Finals competition.

6.9: Updated website
Credit: Lunar

6.10: Optimised mobile site
Credit: Lunar

Keywords added in meta description to allow search engines to promote our website:

Keywords: Formula 1, Racing, Lunar, F1 in Schools, STEM.

DIGITAL MEDIA EXECUTION

Off page

Social media integration: Rather than using a link-tree we aimed to direct all traffic through our website, acting as a central hub for all team insight.

Advertising: Our team website was promoted on our team's main assets, and other external advertising.

7.1: Website domain on team assets
Credit: Lunar

Paid Advertisements

To increase awareness of our Instagram page and other linked sites, we invested in paid advertisements to extended the post's life. However these proved to be ineffective - whist the post remained recommended to accounts for 20 days, they didn't generate much more site visits than regular posts. Thus we stuck with organic advertising.

7.2: Paid advertisement
Credit: Lunar

AUDIENCE ENGAGEMENT

4-Phase Plan

We broke up our digital media into 4 manageable phases to leverage the different stages of our team's progress leading up to the World Finals.

Phase 1: National Finals Victory

Following our National Finals win, we were able to leverage the gained attention with increased organic accounts reached, and leveraged external users who wanted to post about us, and from the Australian Grand Prix.

Account's reached: 1,100
Engagements: 330
Engagement Rate: 30%
Platforms:
Target audience: All

Organic total from all platforms.

Top posts on Instagram and Facebook.

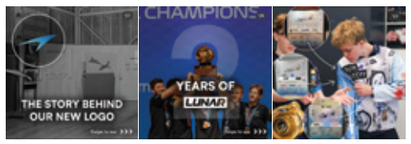

7.3: Posts following our win
Credit: Lunar

Phase 2: Team Information & Platform Re-establishment

Insights into our team

By providing further information about our team, we were able to inform mainly close supporters who are interested rather than a broad range of audiences, which is why these types of posts didn't hit our 27% engagement rate goal.

Account's reached: 2,888
Engagements: 490
Engagement Rate: 17%
Platforms:
Target audience: Close supporters, F1 in Schools community, Prospective sponsors

7.4: Team insight posts
Credit: Lunar

Throwbacks

Bringing back memories of our past competitions, cars and events proved to be an effective way to promote engagement from close supporters.

Account's reached: 2,100
Engagements: 506
Engagement Rate: 24%
Platforms:
Target audience: Close supporters, F1 in Schools community

7.5: Throwback posts
Credit: Lunar

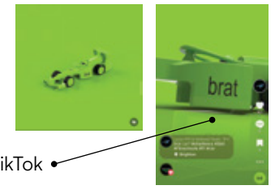

Phase 3: Content Proliferation

Phase 3 involved more fun and casual content to properly engage with our less professionally oriented audience (younger demographic).

Global trends

We aimed to use trending audios, memes, or depicting our car and team in a unique way to leverage global trends and gain interest from less informed about F1 in Schools audiences. These posts had a high engagement rate due to their mostly silly nature.

Account's reached: 9,331
Engagements: 5,200
Engagement Rate: 42%
Platforms:
Target audience: General public

7.6: "BRAT"car (trending music album)
Credit: Lunar

Top post on TikTok

Beach clean-up

See page 3 - This casual style of content showcased our connection to our local community, and was depicted in a way to appeal to younger audiences like us.

Account's reached: 4,200
Engagements: 299
Engagement Rate: 31%
Platforms:
Target audience: General public

7.7: Beach cleanup videos
Credit: Lunar

Giveaways

As described on page 3, we gave away team phone cases and uniforms to our audience to fit with our new branding, allowing supporters a chance to win a piece of our team, and feel a deeper connection with us, fuelling positive engagement.

Account's reached: 720
Engagements: 200
Engagement Rate: 27%
Platforms:
Target audience: Close supporters

Phase 4: External Leverage

Phase 4 involved more professionally oriented content as we work with highly established users and companies - not all of these posts were able to be accurately evaluated, as being externally leveraged, we don't have access to their meta statistics.

Sponsor collaboration

Creating posts in collaboration with our sponsors from their visits to our workshop, and advertising their CSR initiatives in supporting us, gave us access to their established user-bases. These posts however didn't provide a high engagement rate, but rather more accounts reached.

Account's reached: 2150
Engagements: 579
Engagement Rate: 27%
Platforms:
Target audience: Close supporters, F1 in Schools community

7.8: Sponsor collaboration posts
Credit: Lunar, Red Energy, Arctic Wolf

**Unsure of external statistics.*

Social issues

Unlike our regular posts, rather than focussing on engagements, we used our digital media as a platform to highlight social issues in our community that need solving, in the hopes that others either take action, or spread further awareness.

7.9: Breast cancer awareness
Credit: Lunar

EVALUATION

Platform Evaluation

Difference from goal (previous page)

Instagram

100 posts **+0** | **925** followers **-75** | **100,000+** views

We were able to leverage visually appealing posts for a visually oriented audience base to achieve our goals.

TikTok

10 posts **-10** | **335** followers **+35** | **1607** likes

Our TikTok performed much better than we anticipated, due to the success of short videos, however our content schedule was too tight due to the time it takes to create this conent, so we weren't able to post as frequently as we wanted.

X/Twitter, Youtbube & facebook

56 posts	+6	**25** followers	-50
3 posts	-3	**20** followers	-30
24 posts	-6	**5** followers	-45

These platforms did not perform well despite us initially posting regularly, due to their lower reach potential and more community focused user-base, thus we stopped using them in the lead up to our competition.

Discord Server

Leveraging the social aspect of Discord, we regularly interacted with close supporters through our server called "Lunar Community." We also collaborated with other large servers to promote each other's servers, allowing us to gain members.

79 members **+29**

LinkedIn

26 posts **+1** | **20** followers **-15**

Although our reach was limited, we were still able to connect and share updates with our sponsors and professional audience.

Website

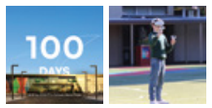

2,300 site visits **+1** | **(+630%** mo/mo)

These improvements were due to our SEOs, which were highly effective.

Plan Changes

Graphic vs authentic posts

We found posting more authentic media than graphic posts yielded higher engagement.

7.11: Graphic (left) vs authentic (right) posts
Credit: Lunar

TYPE	ENGAGEMENT RATE (%)
Graphic	17
Authentic	26

Photos vs Videos

As researched, short videos performed much better than photos, however we should have invested more time in creating videos than photos to leverage the higher engagements we experienced.

TYPE	ENGAGEMENT RATE (%)
Photos	19
Videos	34

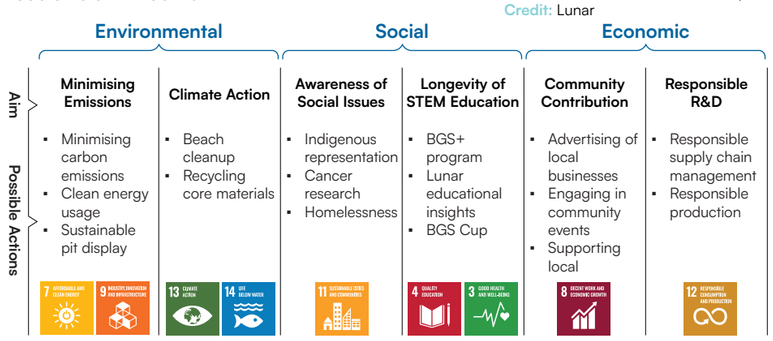

7.12: Photos vs videos (average)
Credit: Lunar

SUSTAINABILITY STRATEGY

SUSTAINABILITY MANAGEMENT

Issue Identification

8.1: Issue identification and actions plan
Credit: Lunar

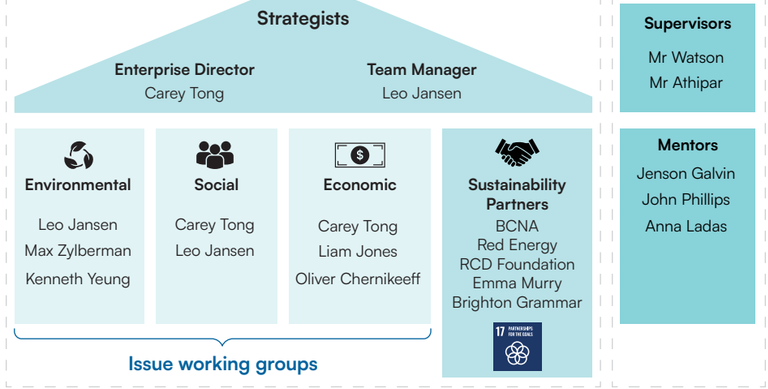

United Nations Sustainable Development Goals (UN SDGs)

We aligned all our initiatives and plans with UN SDGs (see above) to ensure our sustainability aligned with global standards.

Sustainability Governance Structure

This structure was formed to ensure that our sustainability goals are hit and implemented on every level of our team's operations, and held accountable by our supervisors.

8.2: Sustainability governance structure
Credit: Lunar

Strategists: Carey and Leo are responsible for managing all sustainability operations by identifying key issues, creating strategies with the team, and monitoring them alongside our supervisors.

Issue working groups: By assigning team members to specific pillars that relate to their team role, they can take charge of executing sustainability plans alongside their regular role.

- **Environmental:** Reducing carbon footprint, climate action and life below water.
- **Social:** Promoting wellbeing and longevity of all stakeholders and our community.
- **Economic:** Responsible supply chain & production, community engagement.

Sustainability partners: Companies that provide us a platform for sustainability initiatives to be executed from and assistance with our operations.

Supervisors: Our supervisors overseeing our sustainability operations involve our teachers who help to review our initiatives and strategies, and provide expert advice on them.

Mentors: Don't directly assist with our operations, but provide professional advice and mentorship to achieve our goals above.

Materiality Assessment

Through engaging with our external stakeholders and our school, we were able to identify material issues that were relevant to each of them, so we could align our team's initiatives to solve these problems.

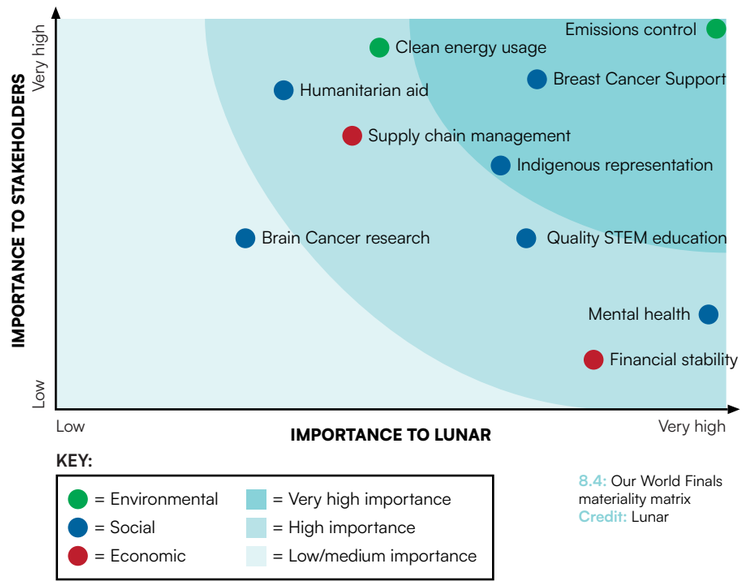

To inform our stakeholders on our progress.

STAKEHOLDER	AREAS FOR CONCERN	COMMUNICATION
Team members	▪ Mental health ▪ Occupational health & safety ▪ Emissions control ▪ Financial stability	▪ Team meetings ▪ Individual chats ▪ Online communication
Sponsors	▪ Breast Cancer Awareness ▪ Clean energy usage ▪ Cybersecurity ▪ Emissions control ▪ Responsible consumption & production ▪ Local business/community support ▪ Quality healthcare ▪ Quality STEM education	▪ Emails ▪ Newsletters ▪ Meetings
School community	▪ Longevity of F1 in Schools ▪ Quality STEM education ▪ Energy & resource consumption ▪ Humanitarian aid ▪ Financial stability (of F1 in Schools program)	▪ Emails ▪ Meetings
Close supporters	▪ Emissions control ▪ Quality STEM education	▪ Social media platforms
Wider community	▪ Emissions control ▪ Environmental conversation	▪ Social media
Suppliers	▪ Honest operation ▪ Mutual benefit ▪ Supply chain management & risk response ▪ Product quality & safety	▪ Emails ▪ Meetings

8.3: Identification of our stakeholders areas for concern (material issues)
Credit: Lunar

Materiality matrix

Using the identified areas of concern above, we scored the overall importance of each based on their importance to stakeholders and importance to us.

8.4: Our World Finals materiality matrix
Credit: Lunar

ENVIRONMENTAL SUSTAINABILITY

Accounting for Emissions

In accordance with the *'World Resources Institute Greenhouse Gas protocol corporate standard'*, we accounted our greenhouse gas emissions are in the three scopes below.

- **Scope 1:** Direct Emissions (owned and controlled resources, facilities, manufacturing emissions by us).
- **Scope 2:** Owned indirect emissions (energy consumption).
- **Scope 3:** Not owned indirect emissions (Travel, waste generated in operations, purchased goods/services).

GHG impact (CO_2e kg)

Emission	Reason		Emission	Reason	
SCOPE 1: DIRECT EMISSIONS			**SCOPE 3: INDIRECT EMISSIONS**		
F1 workshop	Electrical tools	210	Flights	Transport fuel burn	13800
Car manufacturing	Electrical equipment & resource usage	420	Car travel	Transport fuel burn	230
			Accommodation	Energy usage	20
Canister emissions	Direct CO_2 emissions	20	Pit display manufacturing	Electrical equipment & resource usage	340
Other	*contingency	200			
SCOPE 2: ENERGY CONSUMPTION			Sourcing of uniforms	Electrical equipment & resource usage	1000
Electricity	Energy usage	2010	Sourcing of 3d printed parts	Electrical equipment & resource usage	130
Other	*contingency	300	Sourcing of other car parts	Electrical equipment & resource usage	120
			Other	*contingency	2000

Because these are estimations, we added some extra to be sure we accounted for all, if not more emissions.

Total: 20,810kg

8.5: Lunar's GHG emissions
Credit: Lunar

These kg figures were calculated in collaboration with our supervisors, mentors, GHG Equivalencies calculators and estimations.

Minimising Emissions

Pit display

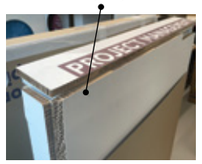

Sustainability is a core element of our pit display.

Materials: The main structure is made from 100% recycled cardboard.

Packaging: To minimise luggage, all of our boxes fit within 2 thin boxes, and all other elements are delegated in the suitcases of our team members. The packaging within this is also sourced from a previous pit display used at our school. We did not source any new materials for packaging.

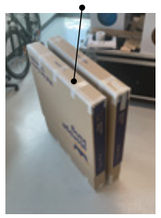

Electricity: Our pit display is powered by rechargeable 18V batteries, charged with our own solar panel, ensuring a completely off the grid powered display!

Cardboard from Team Constellation's 2023 display.

8.6: Packaging of pit display
Credit: Lunar

Our whole pit display structure!

Recycled plastic wheels

Our wheels were injection molded from recycled bottle caps that were collected off our local beach during our beach cleanup (see next page). Whilst our final wheels were resin printed (for performance), the many wheels we tested out of plastic were all recycled, eliminating the need to source likely unrecycled plastic.

SUSTAINABILITY INITIATIVES

Recycling pit display fabric

Our past pit displays consisted of fabric banners, which were difficult to recycle, which is why we sewed them into tote bags to use at the World Finals, and a jacket symbolic of our team history.

9.1: Recycled jacket and bags, and our past pit displays the fabric is from
Credit: Lunar

Energy efficient facilities

To ensure we are gaining direct access to green energy, we worked with our school to connect our F1 in Schools workshop (a separate building) to our school's solar panel network, able to reduce our reliance on the grid, and even selling back to the grid.

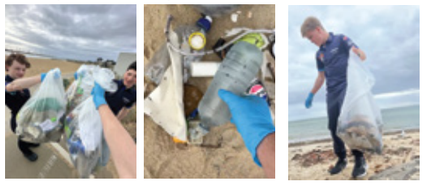

9.2: Our solar panel network
Credit: Lunar

Climate Action

Lunar beach cleanup championship

During September, our team created a fun competition where we tasked ourselves 2 hours to cleanup rubbish from our local beach, challenging each other who could collect the most trash during this time. This was done multiple times in the lead up to our competition, and also doubled as an effective marketing activity.

Total trash collected: 60kg

9.3: Photos from the competiton
Credit: Lunar

SOCIAL SUSTAINABILITY

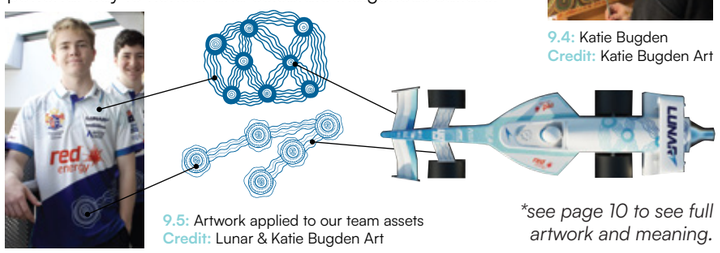

Awareness of Social Issues

Indigenous representation in Australia

An ongoing issue faced in Australia is the representation of Aboriginal and Torres Strait Islander (native to Australia) whose voices are marginalised by governments, media and industries. To show our appreciation of Australian Indigenous culture, we collaborated with Katie Bugden, a proud Kamilaroi (Indigenous community) artist to incorporate authentic Indigenous artwork in our team identity, artwork being a powerful way to honour and celebrate Indigenous culture.

9.4: Katie Bugden
Credit: Katie Bugden Art

9.5: Artwork applied to our team assets
Credit: Lunar & Katie Bugden Art

see page 10 to see full artwork and meaning.

Breast Cancer Awareness Month (October)

We collaborated with Breast Cancer Network Australia (BCNA) to help spread awareness of Breast Cancer in our school community, and our digital media audience. This was done by arranging for a representative at BCNA to do an assembly presentation to our entire school of 1500+ students about the impact of breast cancer, and the support network of BCNA.

In support, we also "turned our team pink" during October. This initiative was especially impactful since attending an all-boy school, breast cancer is not widely known about.

Breast Cancer has also affected the life of one of our F1 in Schools teachers, whose family member passed away from the disease, which is why we have a personal connection with this cause, and why we are passionate about spreading awareness of it in our school, and on the world stage in collaboration with BCNA.

9.6: Breast Cancer awareness and BCNA visit
Credit: BCNA, Red Energy & Lunar

Mental health

Partnering with Emma Murray's High Performance Mindfulness (HPM) coaching software, our team gained access to their weekly 15 minute mindfulness modules allowing our team to combat the high pressure nature of the competition and mitigate burnout, a common issue faced by our team.

9.7: HPM module
Credit: Lunar & HPM

Quality STEM Education

BGS+ racing program

Our team helped establish BGS+ Racing, a competition for Year 6 students at our school interested in STEM to gain a taste of F1 in Schools by building their own paper cars before they participate in the actual competition in high school. Lunar hosted the first 3 runs of the program, where they build, decorate and race their cars over 4 weeks.

9.8: Photos from BGS+ Racing & various students participating
Credit: Lunar

Due to the increase in interested students as a result of this, we hosted an internal competition for our senior teams to determine who progressed through to the State Final, but also providing STEM exposure to new students. This involved a scaled-down version of verbal presentations, portfolios and racing.

As a result of these 2 programs, 80 more students now participate in F1 in Schools & BGS+ Racing at our school!

Mentoring and education media

To help other younger teams, we published insight and tutorial videos on our team's YouTube channel, allowing for students to learn directly from us in conjunction with our regular sessions at the BGS+ program. These videos are also open to the public.

9.9: Physical mentoring
Credit: Lunar

ECONOMIC SUSTAINABILITY

Community Contribution

Exposure to local businesses

By showcasing Bendigo Bank Elwood banners and discussing their support to our team during our 9News feature, it provided nationwide exposure to both us and the local community bank in Elwood (suburb near us).

We also provided exposure to the small business, Paper Tiger, who supplied our pit display boxes which we showcased on our digital media assets, and was used as a case study for their own business and product marketing.

RCD Foundation - Connors Run

Whilst also being a social sustainability activity, our collective donations of $350 to participate and support the annual fun run. This run called "Connors Run" is to raise money for brain cancer research.

9.13: Us at Connors Run
Credit: Lunar

Responsible Supply Chain Management

To ensure our team is responsibly sourcing our equipment and team assets, we always ensure our orders are sourced with minimal shipping distance to support local business as opposed to possibly supporting overseas suppliers with larger carbon footprints and possibly unethical business practices.

ASSET	SUPPLIER	PRODUCTION LOCATION
Pants	Anthony Squire	Local store
Tether guides	Applied fishing	Local store
Shoes	Asics	Local store
3D printing	Objective 3D	Melbourne, Australia
Pit display	Paper Tiger	Melbourne, Australia
Uniforms	S-Trend	China

Only 32km away - worth it due to high quality printing.

Only 23km away - worth it due to flat packaging and Less than Truckload (LTL) shipping.

9.14: List and justification of key external suppliers ensuring responsible supply chain management
Credit: Lunar

Uniform: To achieve high quality printing, low cost and sustainably sourced fabric, we decided to use this factory outsource supplier as opposed to a local store.

"Production centre and quality management processes are certified through the International Standards Organisation 'ISO 9001' accreditation."

- S-Trend

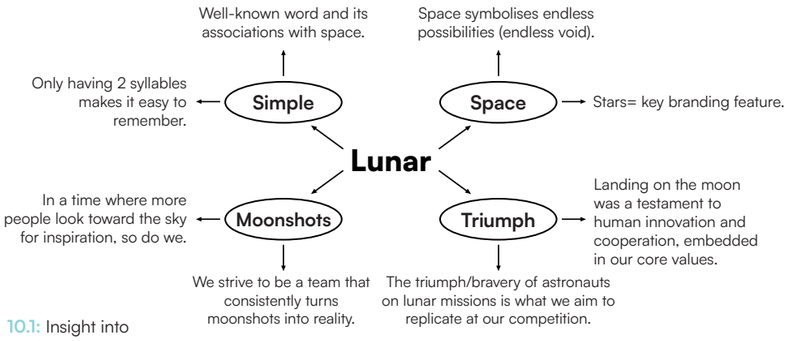

TEAM IDENTITY

BEHIND OUR IDENTITY

Core Values

- Striving for **excellence** in everything we do, aiming to deliver exceptional results.
- Embracing creativity and **innovation** to drive progress.
- Aiming to pursue every opportunity with **ambition**.
- Representing **Australia** with pride and respect.

Behind the Name

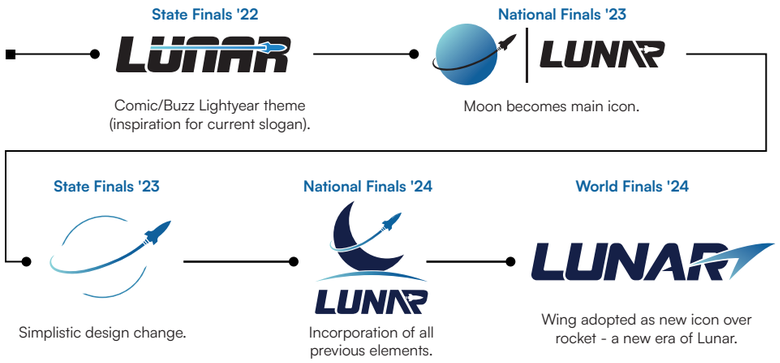

10.1: Insight into our team name
Credit: Lunar

Behind the Slogan

Our slogan "AND BEYOND" is to always be accompanied by our team name or wordmark logo to read "LUNAR AND BEYOND". This is reference to Buzz Lightyear's (fictional astronaut) famous phrase "to infinity and Beyond' symbolising limitless possibilities. This is what we embody in our core values of striving for excellence, and going above "AND BEYOND" in everything that we do.

10.2: Our wordmark and slogan
Credit: Lunar

Logo Evolution

10.3: Team logo evolution (2022-2024)
Credit: Lunar

Design Ideology

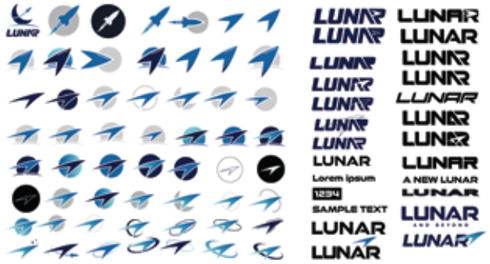

Our new design ideology emphasises simplicity and symbolism of the design and development of our car, and continuing our space theme. This was achieved by settling on one main icon (as opposed to the multiple icons we had at Nationals), and displaying the essence of speed through our italic typography in the logo.

TEAM LOGO

Logo Development

10.4: Initial logo sketches
Credit: Lunar

10.5: Digitalisation of some logo ideas
Credit: Lunar

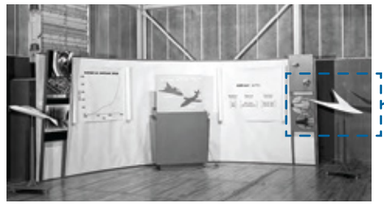

10.6: Final logo variations
Credit: Lunar

Behind the Final Logo

Our wing logomark resembles the shape of a supersonic test aerofoil built by NASA in the 1960s to test aircraft wing shapes. This wing was directly described as 'a symbol of the leading-edge aeronautical efforts of NASA,' after it was showcased at an exhibition (figure 10.8) by senior research engineer, James Modarelli.

66 years later, we've used this shape as a symbol of our own research and development efforts into our F1 in Schools car.

10.7: Image of a modelled prototype of the wing (1959)
Credit: NASA

10.8: Our final icon
Credit: Lunar

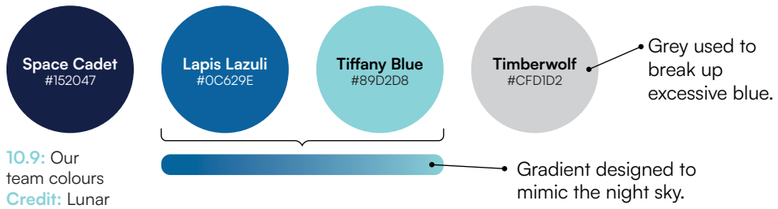

Made to point upwards, symbolising our pursuit of excellence, to Lunar and Beyond.

VISUAL IDENTITY

Colours

Our colour palette has only ever consisted of blue variations (except white, black and grey), because blue is widely associated with imagination and intelligence, both of which connect directly to our F1 in Schools team - the imagination of our ambitions to win the World Finals, and the intelligence required to design an elaborate F1 in Schools car.

Our colour gradient is also designed to be visible on both light and dark backgrounds.

10.9: Our team colours
Credit: Lunar

Stars

Linking with our space theme, the stars are made to be a subtle background asset, like they are in our night sky.

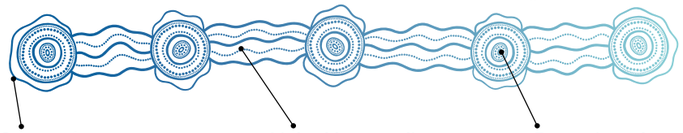

10.10: Our star pattern
Credit: Lunar

Indigenous Australian Artwork

Collaborating with Kamilaroi artist, Katie Bugden, a set of symbolic artworks were developed that reflect our team's history and dynamics using Aboriginal Australian symbols, reflecting our Australian identity.

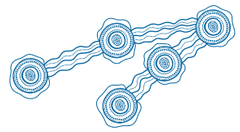

10.11: Indigenous team artwork main design
Credit: Katie Bugden Art

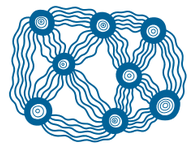

The Corona (outermost part of the Sun's atmosphere): Our connection to our space theme, as the Australian's connection to the night sky and constellations.

Linked by songlines: Representing our bond as a team and our collective achievements to get to the World Finals.

5 meeting places: Our 5 team members (before we became 6).

10.12: Main design in the shape of our logo
Credit: Katie Bugden Art

10.13: Simplified version of the main design
Credit: Katie Bugden Art

Typography

'Satoshi' is the primary font family for Lunar. This modernist sans serif typeface's geometric letterforms are reflective of our team's modern style and our simplistic design ideology.

10.14: Other text applications
Credit: Lunar

TEAM BRANDING CONSISTANCY

10.15: Application of our team branding on key elements
Credit: Lunar & Katie Bugden Art

Style guide

We developed a detailed style guide to ensure our logo and branding were applied consistently across all team assets and external applications - view this document during our Enterprise interview.

PIT DISPLAY DESIGN PROCESS

PLANNING

Objectives

Due to the high cost and effort, and low marks associated with the Pit Display, rather than simply aiming to achieve the highest marks possible, we set our objective to score in the top bracket to ensure cost effectiveness.

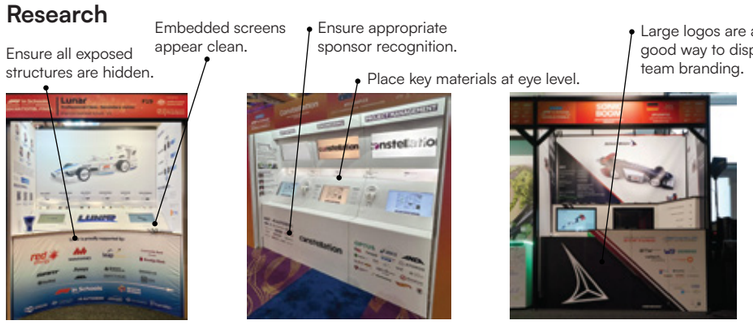

Priorities

To achieve our objective, we established a list of priorities for the pit display, ensuring our designs focused on key elements to allow us to appropriately create our display and secure top bracket scores. This also served as a method to evaluate prototypes and ensure alignment with our objective.

1. Transportability to event
2. Reflecting our team journey to the World Finals
3. Functionality & user experience
4. Cost effectiveness (budget = $5,000)
5. Use of sustainably sourced/recyclable materials
6. Aesthetics and visual appeal

Made most important after competition location was announced, revealing strict luggage restrictions.

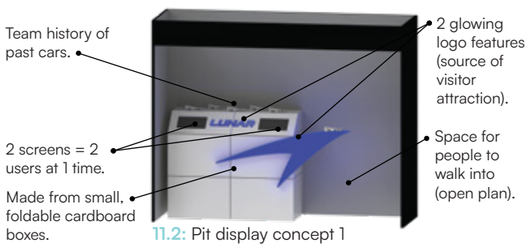

Research

11.1: Displays that design inspiration was gathered from
Credit: L to R: Lunar, Constellation, Sonic Boom Infinitude, Unity Games

DEVELOPMENT

Design 1: Rectangular Table and 3D Logo

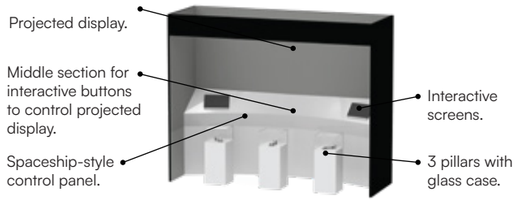

11.2: Pit display concept 1
Credit: Lunar

Positives:
- Cardboard boxes can be packed into other boxes in the display.
- Large glowing 3D logo adds a memorable centrepiece.
- Timeline of past cars express our team's history and story.

Negatives:
- The boxes and thin logo are too simple, and doesn't really appeal well.
- Sharp edge of our logo could be a safety hazard.
- 3D logo doesn't meet travel restrictions.

Design 2: Control Panel

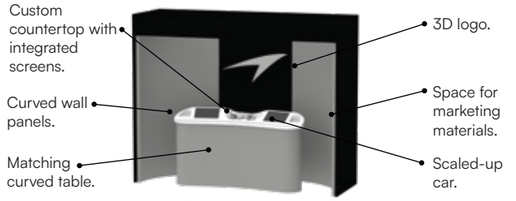

11.3: Pit display concept 2
Credit: Lunar

Positives:
- Reflective of space theme (rocket ship control panel).
- Pillars of cars highlight our history prominently.
- Buttons on control panel add functionality.

Negatives:
- Pillars make it difficult to enter control panel.
- Large design is difficult to transport.
- Projected display may interfere with venue lighting.

Design 3: Curved Table

11.4: Pit display concept 3
Credit: Lunar

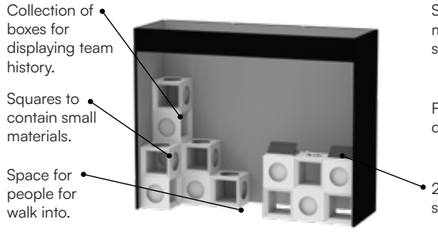

Positives:
- Curved structure helps welcome visitors.
- Space behind allows for a team members to stand there.
- Screens embedded in countertop appear clean with other materials.
- 3D highlighting team identity prominently.

Negatives:
- Large frames needed for curved structure are difficult to transport/pack-down.
- Space behind is quite tight, needed visitors/team members.
- The curved structure cannot curve around whole display, not being seamless.

11.5: Other options considered for the table
Credit: Lunar

Design 4: Modular Boxes (Final Design)

11.6: Pit display concept 4
Credit: Lunar

Positives:
- Abstract design is unique & open plan.
- Boxes are made from recycled cardboard.
- Each box is easy to pack down & transport.
- Every box can display materials (many places to display items).
- Cheap in cost ($700 for box structure).

Negatives:
- The recycled cardboard was found to be flimsy and prone to damage when handled.

To prevent the cardboard from being damaged, we ensured each box was tightly packed with foam and other excess cardboard to protect the delicate surface.

11.7: Tightly packaged boxes
Credit: Lunar

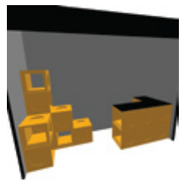

Testing

Virtual reality (VR)

To allow us to visualise our pit display in full scale without assembling each prototype, we tested all of our designs in VR. This also allowed us to gather multiple perspectives of how the display will be viewed and interacted with once built.

11.7: Side-by-side comparisons of displays
Credit: Lunar

11.8: Visitor perspective of design 4
Credit: Lunar

1:6 scale model

Once we decided on our modular box design, we built a miniature model of each box to test different layouts for the display, without risking damage to our actual boxes.

11.9: Trialing different layout in miniature model
Credit: Lunar

Final Evaluation

PRIORITY	1. RECTANGULAR TABLE	2.CONTROL PANEL	3.CURVED TABLE	4.MODULAR BOXES
Transportability to event	3	1	4	9
Reflective of team's journey	5	5	3	9
Functionality & user experience	5	9	5	5
Cost effectiveness	8	1	8	7
Use of sustainable materials	7	3	6	10
Aesthetics & visual appeal	1	7	3	7
Total	31%	36%	59%	91%

A score with weighted values ensuring higher priorities that were met scored higher.

11.10: Pit display concepts evaluation
